GRAPE TOMATO

It's New!

Not a novelty, but a perfect-tasting, heavy-bearing, vigorous Tomato. Never saw a rotten one or a vine that wasn't loaded. Unusual in size, as the individual Tomatoes are small, a little larger than California grapes and as tasty, but are borne in hardy and will bear even if all other Tomatoes in town fail. Especially good for canning, preserves and sauce, because of the size, but there's nothing better for eating. Seed scarce. Price: Pkt., 19c; ½ oz., 29c, postpaid.

THE NEW EARLY

Giant Wrinkled "Alaska"

- EARLY AS ALASKA
- TENDER AS LITTLE MARVEL
- DISEASE-RESISTANT

Here's the Pea everyone has wanted. Early and prolific like the Alaska, but sweet, tender, and wrinkled like later Peas. A combination you can get in no other Pea! Only limited supplies of seed, so please order early. Triple size pkt. (3 ozs.), 15c; ½ lb., 24c; 1 lb., 39c, postpaid.

THE PERFECTED CANNER (Deep, Dark) Red

A new Beet that beats them all. If you are looking for perfection, stop right here. This Beet not only has the richest deep, dark red, but doesn't lose it in cooking or pickling. Won't fade. It's small, uniform and smooth with practically no tap root. You can't find a better all-around Beet for any purpose, especially canning. Price: Pkt., 15c; 1 oz., 25c; ¼ lb., 75c, postpaid.

The New BABY POTATO LIMA

(Dwarf Bush Lima)

- ALL-AMERICA SILVER MEDAL WINNER

- Originated by University of Illinois

A new cross of Henderson's Bush Lima and one of the Potato Limas and better than both. Very prolific, flavor similar to Big Fordhook. Thriftier and more robust than Henderson's. Matures 72 days. Fine for produce markets, canning or quick freezing. Price: Triple size pkt. (3 ozs.), 15c; ½ lb., 25c; 1 lb., 45c; 3 lbs., \$1.15, postpaid.

THE MARVELOUS 5-IN-ONE APPLE

The miracle tree. It bears 5 different Apples (that come on all season long) ON ONE TREE! Think of it! An ideal tree for the small yard, but thoroughly practical anywhere.

Bears these five choice varieties on one tree:

- ANOKA
- YELLOW TRANSPARENT
- DOUBLE RED DELICIOUS
- YELLOW DELICIOUS
- STAYMAN'S WINESAP

Trees are all heavy rooted. Will bear very young. Supply short but while they last will sell them cheap. Last year sold out before April 1st, so order early.

STANDARD GRADE: 89c ea.; 2 for \$1.60, postpaid.
EXTRA HEAVY (quick-to-bear size), \$1.19 each; 2 for \$1.98, postpaid.

SPECIAL CATALOG EDITION—Shenandoah, Iowa, Jan. 1, 1941

No. 1

Goin' to Get Gardening Early

Here's little Paul Lessman, of Wakefield, Nebr., setting a good example for his elders. He's got his garden tools out already and is going to show you folks that the way to have the best garden is to have the earliest. And that's good advice. Send those orders in early! Picture sent in by his mother with her regular garden seed and nursery order.

Planting Instructions Free

Don't worry, if you're not quite sure how something in the catalog is to be planted. If it isn't all explained there, complete planting instructions will be sent with each order whether for garden seeds or nursery stock. It's a great help to a beginning gardener and even some of you old experts might get a little good out of it.—H.F.

This Year Order Early

This year, of all years, order early. Usually I ask you to order early to avoid the rush and to make sure you get the best of whatever you order. This year, I'm asking you to, because some late orders are not going to get what they want. Nursery stock is scarce. Some items of garden seeds, because of the war, are very short and it's going to be first come first served. I'm not trying to scare you. I'm simply telling you facts. It's a friendly tip that may save you some disappointment.

Dodging work is the hardest work of all, and yields the poorest returns.

95 Years Young—Still Field Booster

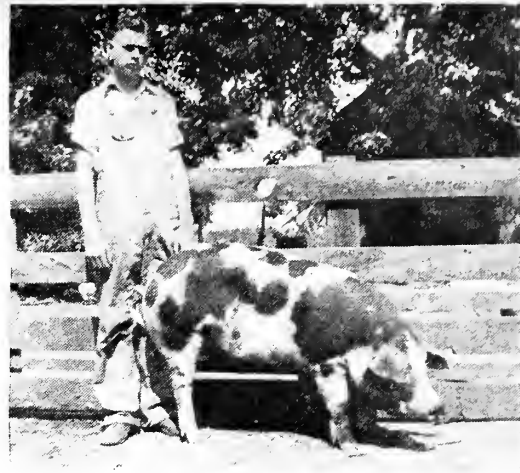

If there's one thing that makes me proud it's keeping good experienced gardeners satisfied and buying from me, year after year. New gardeners make me hump, but there's no one more particular than someone who has gardened for years and years. So when they stay satisfied and won't buy anything but Henry Field seeds, it means I've got the goods to please. This is Mrs. Mary M. Mikesell of Kansas City, Mo.—95 years young and still a grower of Field's prize-winning seeds. Those are Field's Red Head tomatoes.

50c Each for Pictures

Yes, I still need your snapshots. Especially of your Mule-Hybrid corn field, or crib, or with you holding some ears. Also want any of those snapshots of your flowers, gardens, children, family groups or anything you have you know I would be interested in.

If I can use them in the catalog or Seed Sense, I still pay 50c each when I do. The only rule is, they must be extra prints that you don't want back for I never know which I can use till each Seed Sense Time. The best one of all, sent in, will get \$5. Fair deal? Well then get them in. Remember I can't put out a Seed Sense without them.

"A friend is someone who knows all about you and loves you just the same."

Won 19 Ribbons with Field 'Spots'!

This will give you a good idea of the prize-winning blue-blood in all of Henry Field's pigs. Here's what one 4-H boy, Byford Elwonger of Dawson, Nebr., won with a litter from Henry Field start. Whether you're after prizes or profit making quick-maturing hogs, blood from Henry Field's herds is what you want. Here's Byford's winnings last fall—all from one Henry Field litter:

RICHARDSON COUNTY FAIR—HUMBOLDT, NEBR.

1st pig of litter—Grand Champion, Junior Champion, 1st and 2nd prize open class.
2nd pig of litter—1st 4-H and 2nd open class.
Pigs as group—1st.
3rd pig of litter—Grand Champion open class, Junior Champion open class and two firsts open class.

RICHARDSON COUNTY 4-H FAIR—FALLS CITY

1st pig of litter—2nd 3rd pig of litter—1st
2nd pig of litter—1st Pigs as group—1st

The pig in the picture, Byford is standing by, is pig 1 in the prize listing above.

For the latest news and pictures and prices from the Hog Farm, see page 23.

If your life's a grind, be thankful for the opportunity to sharpen your wits on it.

My Own Corner for "Just Visitin'!"

Here I am, sitting at my old desk where I have sat for so many years doing business with you. Mrs. Field took this picture of me right while I was dictating this letter to you. Of course, I'd rather be out in the garden or something of that kind, but I do have to work at this desk a lot, what with all your letters and orders and a million and one things always to do. You see I always keep my pictures, trinkets and books around me, and this is where I visit with you.—H. F.

Dear Folks All:

Well, another year has rolled around, and another catalog is almost ready to go to press, and here I am, as usual, writing the first page of the catalog last of all, and the printers fussing at me to hurry up and get it to them so they can start the big presses rolling.

This has been a great year, hasn't it? A lot has happened since I wrote you a year ago, and there is a lot to happen one way and another this coming year, if I am any judge. I am somewhat like the fellow who said he wanted to "stick around for another year, just to see what would happen next."

But really, it seems to me we have all come through it in surprisingly good shape, and with everything set for a big and busy and probably a prosperous year to come.

We've got plenty of moisture in the ground now, and prices are looking better, and most of us feeling confident and healthy and full of fight, and ready to do greater things than ever this coming year.

Here at the Seed House, we have had tremendous business this fall and winter, and are all set for more business than ever this coming spring. This being the leading seedhouse keeps us humping.

People are more interested than ever in raising a bigger and better garden, more flowers and more fruits, better corn, and better livestock than we have ever had before.

That's the spirit that wins, and that's what will take us through with flying colors this coming year.

I wish you could come and sit across the desk from me here and talk about that garden and the rest of the things you are going to do next summer. Nothing would suit me better. Of course, you can't all come, but lots of people do, and for the rest of you, I'll do the best I can in giving you help and advice and encouragement in the catalog and Seed Sense and my letters and my talks over the radio.

And in return, I hope you will write me a letter and tell me how you are getting along, how your garden is doing, what you are planning to do for the future. Tell me your troubles and I'll promise to help you all I can.

I've got the finest bunch of customers in the world—loyal, friendly, hard working, enthusiastic people, the very salt of the earth, and the kind of people I like to deal with. That's the kind of people I have for customers by the hundreds of thousands. I enjoy them, and their visits, and helping them.

People who get this catalog will get two or three issues of Seed Sense without especially asking for it when they send in their orders. If for any reason you don't get it, just drop me a card and I will see that one is sent to you posthaste.

Plan on having the best garden you have ever had. Of course, I hope you will buy your seeds of me, but whether you do or not, read the catalog through or just look at the pictures and you will get a lot of good ideas about gardening and it won't cost you a cent.

Write me how you like the catalog. If there is something you like particularly well, I wish you would tell me about it; and if there is something you think should be changed I wish you would tell me about that, too. And if there is something left out that ought to be in there, tell me all about it. I am writing this catalog and the Seed Sense to please and help you, and the more I know what you want, the better I can do for you.

The almighty dollar isn't the most important thing in the world, but real friends are. I think every one of my customers is a good friend of mine, whether we've met or not.

And don't forget the Seed Sense is free to every customer who sends in a garden seed, nursery, or field seed order. You are going to enjoy it, and I hope you won't miss it, so get your orders in.

Now I won't bother you any more. Just go ahead and read the catalog and fill out the order sheet in the back. Of course I would like to have an order from you. Even if it is not a very big one, send it along. It takes orders to keep this business going.

Or if you can't send an order or come and see me, write me a letter anyway. Whether you order or not, we can be friends anyway, and if I can help you in any way with advice or information, just help yourself. Come and see me if you ever get a chance. You'll generally find me sitting here at my old desk, just like I am in that picture above.

P.S.: By the way, if you have a neighbor or friend who would like to have a copy of my catalog, I wish you'd tell me on your order and I'll send one out free. Thanks.—H. F.

Inoculate for Bigger Yields

All your garden peas, beans, and sweet peas should be inoculated. Inoculation helps the plant take nitrogen from the air and fertilize your soil—giving you bigger yields, faster growth and garden soil that's not worn out.

Just takes a minute to dust it on your seed—no trouble at all but it makes a world of difference in your yield.

There's enough in this 10c packet to inoculate 6 lbs. of seed. That's enough for most of you. Full directions on each packet. Be sure and everybody order it. Garden Nitragin 10c pkt. postpaid.

Money may not buy happiness, but you can purchase a change of misery with it.

Tractor Parts at 1/2 List

Did you notice back on pages 58 and 59 I have listed tractor parts? You probably wonder why a seedsmen would do that. Well, I'll tell you. Last summer I had to fix a tractor and thought I would go broke paying for parts. After that I met a man who has built up a business selling tractor parts that he buys direct from the manufacturer who makes them for the tractor companies. And he can sell them at surprising prices—sometimes 1/2 of what they usually cost.

They are all genuine parts—absolutely guaranteed. And it's surprising what you can save. Just for example a set of cylinder sleeves for a Farmall usually sell for \$26.40. I can sell them for \$13.88 and still make money. An Allis Chalmers clutch facing usually costs \$4. I can make money at \$1.50. That's only a few. Turn back and look over the pages and see the rest for yourself. And when you repair your tractor—remember H. F. can save you money.

A man once had a garden
And nothing ever grew
Until he used Field's Bug Dust
AND THEN HIS GARDEN WAS THE PRIZE-WINNER
IN TOWN.

This poem doesn't quite rhyme so I won't print the customer's name who sent it in, but it sums up the story told me by so many, I thought I would print it just the same. For the full story about my Bug Dust, see page 66.—H. F.

Writing Flower Seed Order to Henry

Here's the right way to order—get the catalog out early and get your order sent in before it slips your mind. This is Edith Teten of Talmage, Nebr. who though only 12 years old, is setting a good example by ordering her flower seeds from Henry Field before the snow is all melted.

Sent in by Edith's mother who says, "You can see my daughter gets her flower seed order ready early. We enjoy your Seed Sense so much."

Henry Field Store Addresses

Here's the list of my 12 outside stores. I'm putting it down here, so you folks who live close to one of these towns will sure go in and say "hello." The boys are very willing and I know they'll please you. All stock, GENUINE HENRY FIELD SEED and NURSERY.

My Nursery Guaranteed

It's foolish to buy cheap, second-grade nursery stock like is sometimes offered for sale. You might save 10c, but 5 years later when the tree is supposed to bear apples and bears just leaves instead, you'll wish you hadn't fooled with it.

I don't fool around with sickly, cheap nursery stock. Everything that isn't first-class, heavy-rooted, and of the highest-quality is thrown out and burned. That's why I'm able to guarantee my nursery stock with this iron-clad guarantee: This guarantee alone, is reason enough to buy your nursery stock of Henry Field. I guarantee everything to reach you in first class, live growing condition. If you're not pleased in every way, notify me within 5 days and I will replace it at once. After that, up to October 1st, we take half the blame (weather one-half) and replace at half price anything unsatisfactory through any fault of the stock. Fair enough, isn't it?

You can work yourself into a better job, and you can talk yourself out of a good job.

WARNING To Fruit Growers!

- 60% to 90% OF MANY VARIETIES OF FRUIT TREES ARE DEAD!
- REPLACEMENT STOCK SCARCE!
- RESERVE YOUR STOCK NOW!

This is not put here to scare you. I simply want to remind you the extent of the heavy freeze last Armistice day is still not all known. But we do know that the number of fruit trees dead throughout the mid-west is somewhere between 60% and 90% dead.

I've never seen anything like it. The warm weather we had up to Nov. 11 kept trees growing. The zero weather and ice caught the trees before they had "hardened off." AND IT KILLED THEM. Go out and look for yourself and see. The cambium layer (the layer of white wood under the bark) is all brown and that's a sure death knell.

Mostly it was the apples, all the cherries, all the peaches, pears and plums that were killed although some others were caught, too. Some few varieties escaped serious hurt, but not many.

There is going to be a great shortage of fruit trees. Some varieties are already booked up for the whole amount we can supply. RESERVE YOUR STOCK EARLY! It strictly has to be first come first served this year.

Oh, My! What Shall I Order?

"That man Henry Field sure has a lot of good things in his catalog. Here I am already with my tools and things and I just can't decide what to order. But maybe if I get it all ready now, mother will forget to order the spinach."

This young gardener is Gordon Jack Boyer—10 months old. Sent in by his mother Mrs. Fred Boyer, of Cassville, Mo., who says she MUST order her seeds every year from Henry Field to have a good garden.

Grew Mule-Hybrid—Needed Extra Crib

When you grow Mule-Hybrid corn, you better get prepared with plenty of storage because you will need it. Here's a picture sent in by W. H. Theel, of Douglas, Minn., who says, "This is what happened when I planted Henry Field's hybrid corn. Three corn cribs full and still didn't have to store 1/2 of the corn. It is of very good quality, stands up well for it has a good root system."

Incidentally, some numbers of our Mule-Hybrid are going to be sold out soon. Please, you regular customers, get your orders in early so we can reserve the exact number you want and not disappoint you. Mule-Hybrid is taking the country by storm—you save by buying direct, BUT YOU ALSO GET THE BETTER HYBRIDS—real heavy-yielding, farmer-style corn.

Have You Heard About the Sensational Vitamin B₁?

Everybody is talking about this sensational vitamin for plants—Vitamin B₁. The miraculous things it does when added to plant's soil are almost unbelievable!

Better Homes and Gardens who announced the discovery and have written article after article about it report 5 inch rosebuds, dahlias 10 inches across; enormous apples—all because Vitamin B₁ was added to soil which is almost always deficient in this very necessary stimulant. It can be used in solution to water plants, shrubs, or trees, or the roots of plants can be dipped in it to stimulate root growth and allay the shock of transplanting.

I can supply this plant vitamin in two forms—tablet form or stock solution form. Both are easy to use and go a long way. Be sure and order with your seeds. You'll want to work some miracles with your garden this spring.

TABLET FORM—Easy to use. Simply dissolve one tablet in 2 or 3 gallons of water. Use solution to water flowers or to dip roots of plants in. Full directions on bottle. 100 tablet size, \$1.00; 50 tablet size, 50c, postpaid.

STOCK SOLUTION FORM—Concentrated solution. Comes in bottle with eye-dropper. One drop of this solution in 1 or 2 gallons of water is enough. Bottle will make 500 to 1,000 gallons—enough for entire season. Bottle only, \$1.00, postpaid.

There's always room at the top because so many who get there go to sleep and roll off.

A Jr. Seedsman in SOUTH AFRICA

This is MAGNUS L. A. AMOREIWE of LAGOS, NIGERIA, clear over in AFRICA who has been a Junior Seedsman now for three years. And he puts some of you American boys and girls to shame with the way he earns premiums. The last one he took was a wrist watch for selling two deals.

I thought you would be interested in seeing his picture taken by a vegetable seller in their market place to give you an idea of the way my Junior Seedsman Club has spread all over the world. Boys and girls everywhere are finding out how easy it is to win premiums by selling seed—easy because it's something everybody wants and needs.

If you haven't tried it yet, be sure and get your collections right away and start out early—it's twice as easy that way.—H. F.

Another Henry Field "Family"

No, this isn't my family, but another family where everyone is a Henry Field booster. It's the kind of picture I'm always so happy to get. It makes me proud and I get kind of a lump in my throat when I read letters like this. Here's what M. A. Greenlee, of Leon, West Virginia, wrote:

"This is a picture of the whole family. My wife, myself, the children, grand-children, son-in-laws, all except one daughter-in-law and one son-in-law. You can see some of the Chinese Elms we bought of you two years ago. They sure do grow and we think they are just wonderful. We have used your seeds for over 30 years and our children that have homes of their own all use them, too."

Now! Buffalo Grass for Lawns!

(The Grass That Needs No Mowing)

To answer hundreds of questions, we will release a little more of our rare stock of Buffalo grass this spring.

Buffalo grass, you know, is the marvelous creeping lawn grass that spreads and covers the ground with the most beautiful green carpet you ever saw. It's absolutely drought-resistant and STAYS GREEN ALL SUMMER even when bluegrass is browned up. And best of all, it NEVER GETS TALL ENOUGH TO NEED MOWING, though you can if you wish.

We ship in sod form at the below prices:

| | |
|---|------------------|
| 1 sq. foot sod (275 plants—enough to plant 200 sq. ft.) | \$1.00, postpaid |
| 2 sq. ft. sod | 1.89, postpaid |
| 3 sq. ft. sod | 2.69, postpaid |
| 4 sq. ft. sod | 3.39, postpaid |
| All carefully packed in moss. You break sod and set plants foot apart each way. Full directions with each shipment. | |

Now! Buffalo Grass Seed!

It has been almost impossible to harvest Buffalo grass seed until last year, when we were able to get a few pounds, though the harvesting is extremely expensive. We have experimented and developed a process of increasing the germination of the seed about 4 times over Nature's method so the seed you get from us is thoroughly processed for quick growth. Seed like any other lawn seed—roll in well. Sow 1 lb. per 1,000 sq. ft. for lawn—for field seeding 4 lb. per A. Stand will be thin at first, but will thicken up and crowd out weeds (if you help it 1st year). Seed very limited. Price while it lasts: 1/4 lb. 89c; 1 lb. \$2.50, postpaid.

He who puts all he has into his work usually succeeds—because he has little competition.

500 Field's Chicks—All Arrived OK

This is Vick, Muriel, and Bobby, all children of Mr. and Mrs. Joe Douglas of Haigler, Nebr., looking over the shipment of White Giant chicks from Henry Field. The chicks really belong to their brother Albert, but kids always have to open the boxes, don't they?

This will give you some idea of the way Field's chicks come through. Always in perfect shape—100% live arrival guaranteed.

Phooey on Taking Pictures!

"I don't care if Mr. Field does want my picture. I'm not going to make any silly old smile." Any way that's what it looks like this grandson of Mrs. Gus Strom of Hiteman, Iowa, is saying.

Mrs. Gus Strom is another good customer of ours and she wrote with this letter, "This is a snapshot of my grandson. His grand-dad says he looks like a typical politician—wondering what to do next."

Field's Famous COFFEE

4 lbs. only \$1.00
10 lbs. only \$2.50
All Postpaid

Years ago, I couldn't find a coffee that quite suited me, so I had a special blend of the best coffees roasted just to my taste. I believe in good coffee—rich and full-bodied and I found the only way to get it was to have it made to order.

My Own Private Blend

The blend I worked out proved so popular that gradually my customers from all over the country asked me to supply them some. Now thousands of customers from all over the United States send regular to me to get their coffee supply. I have no patent on it and am glad to share it.

Brought In Fresh Every Week

A new supply is roasted and sent to me each week. Coffee should be fresh and that's the way I get it. It's packed in a special "towel" bag, which serves as a towel after the coffee is used up. Women like that.

Fully Guaranteed

If you haven't used my coffee, you have a real treat ahead of you. And I want you to try it. Just send your order in and try it once. I guarantee it to taste better, make more cups per pound and please you better than any other coffee regardless of price or it won't cost you a cent. If it doesn't, send it back and I'll refund every cent. If you want a stronger guarantee, write it yourself and I'll stay hitched.

Success does not come so much from sitting up nights, as it does from staying awake in the daytime.

WANTED: 20,000 BOYS AND GIRLS BE A JUNIOR SEEDSMAN... SELL SEEDS

A CHANCE TO WIN

PREMIUMS OR CASH!

You boys and girls these days are looking for a chance to make money and win big prizes. I'm going to help you by getting you into the Seed business with me.

I will furnish the seeds for your start and give you a big share of the profits. I have had as

My First Start in the Seed Business, Selling Seeds to Neighbors

high as 30,000 JUNIOR SEEDSMEN on my list and want 20,000 more now.

You know I started in business for myself selling seeds when I was probably younger than you are now. You have read about it in the catalog. But I didn't get very far at that time, for I had very few seeds to sell and no money to buy more with, and no one to start me in business. I wish I could have had the chance you now have. I would have got a good start in the seed business about ten years earlier than I did.

EVERYONE WANTS A BARGAIN COLLECTION LIKE THIS

This year we're offering the best and most popular collection we have ever put out. It's just what everyone wants. A **WHOLE GARDEN FOR 39c.** 10 giant packets of garden seed in each collection for only 39c. Think of it! Everyone will gladly buy a bargain like this.

Now what I want you to do is sell these seed collections to your friends and neighbors. All you need to do is fill out the application blank below and return it to me and I will send you ten of these collections; then after you have remitted for them I will gladly send you some more if you can use them. A great many of the Junior Seedsmen sold as high as ten or twelve sets and there is no reason on earth why you shouldn't do equally as well if you get an early start. I know you are honest, and I am willing to trust you, and then when you have sold the collections we will divide the profits. How does that suit you? **Henry Field.**

HERE'S MY PROPOSITION

1. Fill out the coupon opposite page and send it to me and I will send you at once by parcel post 10 of the 39c collections for you to sell. You need not send the money till they are all sold, but if you do not sell them within a month, you are to return them.

2. When you have sold ten collections you get one-fourth (\$1.00) the total for your share, either in cash or one of the premiums. By buying these premiums in big quantities and getting the manufacturers interested in my plan for starting boys and girls in business, I have made your one-fourth cover the wholesale cost of each one.

3. You send me the \$3.90 you receive for the 10 collections and tell me which premium you want, and I will send it to you at once by parcel post, except in the case of some expensive premium requiring a little more work.

4. If you would rather have your share in cash, keep out one-fourth and send the rest to me. I trust you to do the dividing.

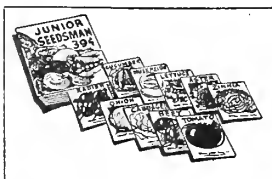

5. In case you cannot sell the 10, sell all you can, return the rest by mail, keep one-fourth of the money and remit the rest.

6. The collections must all be sold at the same price, 39c. We believe in one price to everyone. It's the only way.

DON'T WAIT

Don't put off until some other Junior Seedsmen has supplied your neighborhood. Get an early start and you'll sell more, easier.—H. F.

GREENPODBUSH BEANS

BURPEE'S STRINGLESS GREEN POD

TENDER GREEN

Stringless Yellow Pod Perform

Here's Miss Clara Hellwig of Helvey, Nebr. with a picking of my Stringless Yellow Pod for canning. I guess that shows how they perform.

About Beans

I believe every family should plant at least five or six pounds of beans. (See my special 3 pound prices.) I always have a good supply of seed beans handy. Whenever any of the early or midseason things run out, I fill in the spaces with beans.

A pound will plant two rows 50 feet long. Start your plantings as soon as severe frosts are over and plant every two weeks until the middle of July. You will have fresh, crisp beans all season. Beans like a rich, warm soil.

For late pickles, plant in June. For cucumber bugs use BUG DUST.

THIS IS THE FAMOUS HOLLOW CROWN PARSNIP

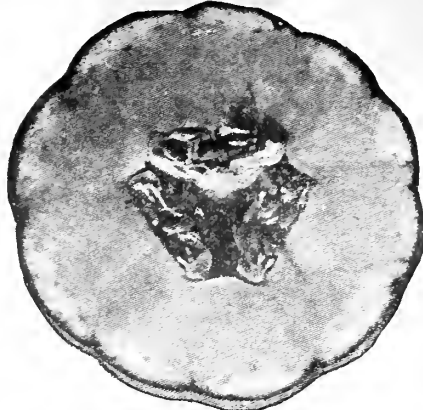

THE BEST IN MUSKMELONS

I'm proud of my muskmelon seed. I don't believe there is another seedsman in the country who has spent as much time fussing with the growers, inspecting crops and worrying about his melon seeds. Every variety is grown by a specialist in an isolated place where it doesn't get a chance to mix with anything else. Plant them after the ground is warm. Figure about three dozen hills for one packet of seed or 100 hills from an ounce. Give them plenty of room, at least 6 to 8 ft. each way.

It's Cuckoo! But It Works

Here's an idea you might try. Mrs. Herman Knoch of Davis, South Dakota, says, "Here are our sons, Floyd and Lloyd and Clyde shelling some of Field's good Dwarf Laxtonian Peas. I thought they were cuckoo when they dragged out the washing machine to shell peas through the wringer, but it worked. They shell them all that way. Accompaniment was a whistle instead of a groan."

Got Any Ideas?

That idea for shelling peas gives me one. Why don't you folks send me some of those labor saving ideas you have. I'll save them and put them in Seed Sense sometime.

PEAS

My seed peas are northern grown, the quality is exceptionally good, and they are free from weevils. The best that grows. Plant the smooth varieties just as soon as you can get into the ground. The wrinkled varieties should be planted a little later. If you want to try a fall crop, use the early sorts, planting them about the middle of August. One pound of seed will plant a row 50 feet long. Peas should be inoculated for bigger crops. Large Pkt. inoculation 10c postpaid.

737 PINK BANANA. (115 days.) Almost identical to the old fashioned blue-gray Banana Squash except that the color is pink or light orange. It has made an unusual name for itself in California. Here in the middle states I find it stands squash bugs and pests much better than most kinds. Some seedsmen say it is bug proof, but I don't claim quite that much for it. PRIZE PUMPKIN MIXTURE

Well, I've made a grand mixture of all the different kinds of pumpkins we have and some extra trial ground sorts. Plant plenty of them in the edge of the cornfield. PUMPKINS

One Oz. Plants 50 Hills

SMALL OR RED SUGAR

Very prolific yielder. Doesn't grow very large. For good eating, it's the nicest in the lot. Price: Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 70c, postpaid.

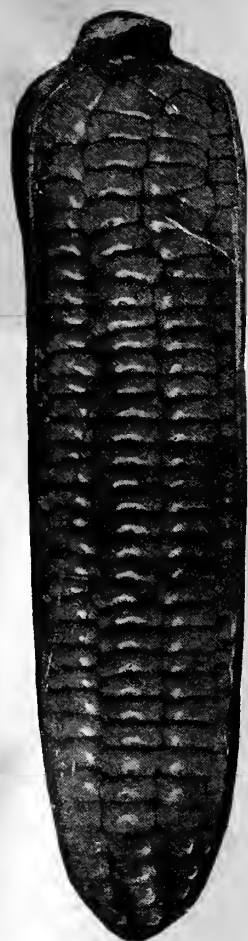

LARGE CHEESE OR "BUFF PIE"

763 (110 days.) A fine cream colored sweet pumpkin. Very flat in shape, slightly grooved, with hard shell. Rich yellow, thick flesh of fine flavor. Price: Pkt. 5c; oz. 10c; ¼ lb. 20c; 1 lb. 55c, postpaid.

SWEET CORN

Wait until the ground is warm before planting any of the later varieties. The early varieties may be planted a week or two sooner. ½ lb. of seed will plant 100 hills or about 10 to 12 lbs. to the acre. Plant at intervals of ten days until the middle of July for new corn all summer.

**GOLDEN BANTAM
Favorite Yellow**

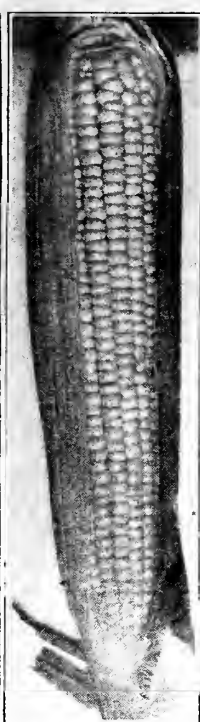

177 (80 days.) I don't know of anyone who doesn't like to set his teeth in an ear of Golden Bantam. It is recognized as the standard yellow sweet corn. Grows 4½ to 5 feet tall, very productive, early, tender, sweet, delicious flavor. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 15c; 1 lb. 25c; 3 lbs. 65c, postpaid.

**COUNTRY
GENTLEMEN**

The Tender White

EVERGREEN**

The Giant
White Corn

188 (96 days.) Don't try to make gardens without this one. Standard variety for both home and market gardener. Plant this one for canning and drying as well as for the roasting ear season. NOW! HYBRID SWEET CORN

- SWEETER
- MORE TENDER
- LARGER
- HEAVIER YIELDS
- DISEASE RESISTANT

WHAT HYBRID SWEET CORN IS

Everybody's planting HYBRID Sweet Corn now. It's more tender, earlier, sweeter, MUCH HEAVIER YIELDER and disease resistant.

Just like Hybrid field corn, the hybrid sweet corn more than pays in increased yields for the cost of the seed. And it TASTES so much better.

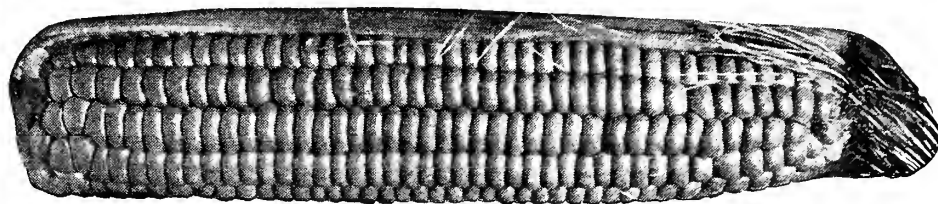

Plant some of all this year. These are the best of 60 hybrids checked in our trial grounds. H. F.

GOLDEN CROSS BANTAM HYBRID

12 to 14 Rows Sweet, Tender Kernels

171 (85 days.) A great big Golden Bantam. It has 12 to 14 rows of kernels, quality exceptionally fine, noted for its uniformity. Strong vigorous grower, resistant to smut, ears are 8 inches long. About a week or 8 days later than the regular Golden Bantam. Fine for canning and is exceptionally good where large ears are wanted. Price: Triple size pkt. (3 oz.) 15c; ½ lb. 26c; 1 lb. 45c; 3 lbs. \$1.15, postpaid.

EARLY GIANT GOLDEN BANTAM HYBRID

178 (65 days.) It was the earliest variety in our trials and we had over 60 different Hybrids there too. Ten days earlier than the ordinary Golden Bantam. Stalks are 4 to 5 feet tall, are heavy, vigorous growers, stand up well, ears are 6 to 7 inches long, rich yellow in color, 2 ears to the stalk. Kernels are long and plump, 12 row variety, quality can't be beaten. A fine market sort for earliest market. Price: Triple size pkt. (3 oz.) 15c; ½ lb. 26c; 1 lb. 45c; 3 lbs. \$1.15, postpaid.

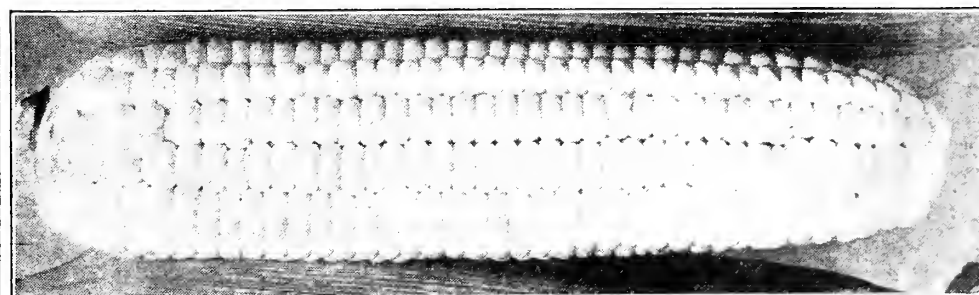

GIANT BANTAM HYBRID

175 (75 days.) This variety was developed especially for the canning trade. About 4 days earlier than the Golden Bantam; open pollinated, runs almost 100% 10 to 12 rows to the ear, ears 7 inches long, very uniform, resistant to smuts and to root diseases. Finest in the lot for canning purposes. Price: Triple size pkt. (3 oz.) 15c; ½ lb. 26c; 1 lb. 45c; 3 lbs. \$1.15, postpaid.

IOANA SWEET CORN

176 (87 days.) Last year's all American bronze medal winner, developed by our own state college at Ames. An attractive and most productive variety. Highly resistant to drought and wilt. Just the thing for the market gardener or for canning. Fine yellow variety, ears 8 inches long, 12 to 14 rows, medium yellow kernels, medium narrow kernels. Price: Triple size pkt. (3 oz.) 15c; ½ lb. 26c; 1 lb. 45c; 3 lbs. \$1.15.

HYBRID STOWELL'S EVERGREEN

THE Heavy Yielding White Corn

184 (97 days.) A deepkerneled hybrid, the result of many years of breeding and crossing. Probably the heaviest yielder of sweet corn there is. Stalks 7½ to 9 feet tall, ears 14 to 18 rows, about 8 inches long. It outyields the ordinary Stowell's Evergreen and is much better in quality, unexcelled for canning. Price: Triple size pkt. (3 oz.) 10c; ½ lb. 25c; 1 lb. 40c; 3 lbs. \$1.10, postpaid.

TOMATOES

I've tried out a lot of different varieties of tomatoes and I've discarded all but the best of them. These varieties are the pick of the lot, over a period of the last 40 to 50 years. My seed stocks are extra select, pure, uniform, and they have to be right. Plant both early and main crop sorts, so you will have plenty.

The New GRAPE TOMATO

SCARLET SLICER

Drought Resistant Heavy Yielder

410 (70 days.) Here's the new one for you. It's deep red fleshed. Its heavy foliage helps to withstand drought and hot winds. It's the ideal slicer (very round and smooth) and is good for canning too. Special price: Pkt. 14c; ½ oz. 20c; oz. 39c, postpaid.

FIELD'S RED BIRD

421 (70 days.) Next to Red Head, I claim this is the finest early tomato I have ever found. It is another one of my own introductions. Grows to a medium size, round, very smooth and seldom cracks. The color is a beautiful bright red. It is a dandy in every way. Price: Pkt. 10c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.00, postpaid.

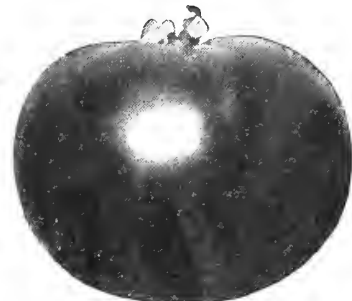

FIELD'S FAMOUS EARLY RED HEAD

Early—Heavy Yielding—Doesn't Crack

401 (76 days.) I introduced Red Head a good many years ago. Since then we have been constantly working on it to make it better. I will put it up against any other variety. It is a heavy yielding sort, bears over a long time. The tomatoes are round and smooth, they ripen evenly, and very seldom crack. The firm flesh makes it a fine canning sort. Price: Pkt. 10c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.00, postpaid.

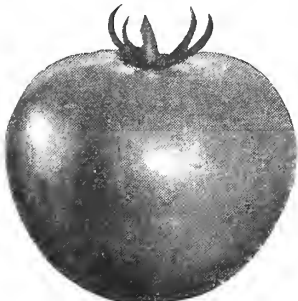

425 (73 days.) (See picture front cover.) Not a novelty—but a perfect-tasting, heavy bearing, vigorous tomato. Never saw a rotten one or a vine that wasn't loaded full. Unusual in size as the individual tomatoes are small, a little larger than California grapes and as tasty, but are borne in big grape-like clusters. Usually absolutely hardy and will bear even if all other tomatoes in town fail. Especially good for canning, preserves and sauce because of the size, but there's nothing better for eating. Seed scarce. Price: Pkt. 19c; ½ oz. 29c, postpaid.

NEW STONE

Standard Main Crop

415 (116 days.) A great main crop variety for canning and general use. Solid, smooth, ripens evenly. Bright scarlet, a good yielder. Price: Pkt. 5c; ½ oz. 15c; oz. 25c; ¼ lb. 80c, postpaid.

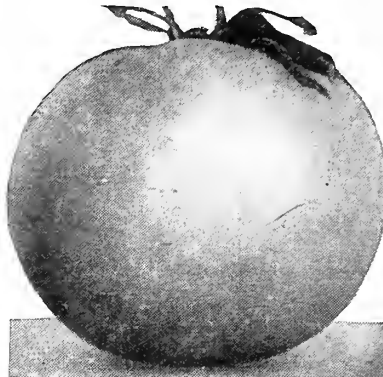

OXHEART

409 (90 days.) Entirely different from any other kind of tomato. Large heart-shaped, pink-skinned variety. The flesh is thick but very tender. It has few seeds. Somewhat late and a great deal after the style of Ponderosa. Has a distinct, appealing, mild flavor. Price: Pkt. 10c; ½ oz. 35c; oz. 60c; ¼ lb. \$2.00, postpaid.

SNOWBALL TOMATO

403 (78 days.) Snowball is an ivory white tomato with flesh almost white. Most as big as Ponderosa—in fact it belongs to the Ponderosa family. Has few seeds and practically no acid. Lots of folks who were unable to eat tomatoes before can enjoy them now that we have this fine new Snowball. Every garden should have a few of them. Price: Pkt. 10c; ½ oz. 60c; oz. \$1.00, postpaid.

MARGLOBE

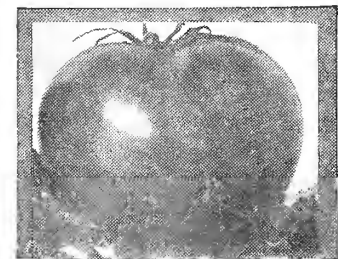

The Perfect Canner

405 (115 days.) Another dependable wilt-resistant main crop. Vigorous grower, medium large, nearly globe shaped, smooth and solid. The quality is extra fine, and it is an outstanding tomato for canning. Deep scarlet. Price: Pkt. 5c; ½ oz. 18c; oz. 30c; ¼ lb. 80c, postpaid.

SCARLET CLUSTER

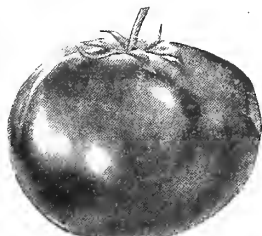

413 (110 days.) We introduced this one two years ago. It's everything that a gardener might hope for. Good sizes, smooth, brilliant scarlet color throughout with thick flesh and small seed cavity. Ripens from the inside out and doesn't crack. Price: Pkt. 10c; ½ oz. 25c; oz. 40c; ¼ lb. \$1.25, postpaid.

FIELD'S EARLY JUNE

Good and Early

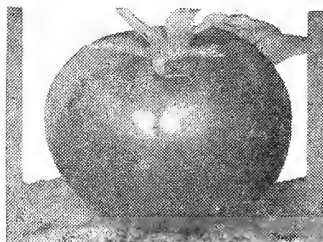

402 (66 days.) Another good extra early one. Not as large as some and doesn't yield as much as some but makes it up on earliness. Medium size, rounding, flat, dark red, fine for slicing. Price: Pkt. 5c; ½ oz. 15c; oz. 25c; ¼ lb. 80c, postpaid.

EARLIANA

Very Vigorous

411 (66 days.) One of the best of the early red tomatoes. Vigorous, spreading vine, bearing bright scarlet, medium size, nearly globe shape fruit, in clusters. Price: Pkt. 5c; ½ oz. 20c; oz. 35c; ¼ lb. 80c, postpaid.

RUTGERS

Likes Drought

417 (110 days.) I found this one in New Jersey. After trying it out here for a couple of years, I am ready to believe that it deserves a place in every garden. It starts ripening on the inside, and you can depend on it being thoroughly ripe all the way through. Doesn't have a hard core, and is outstanding for its uniform deep red coloring. Flesh is firm. Globe shaped. An excellent canning variety. Price: Pkt. 5c; ½ oz. 25c; oz. 40c; ¼ lb. \$1.25, postpaid.

GOLDEN BEAUTY

412 (82 days.) Large main crop yellow variety. Quite a novelty but well worth having. I like it. It's smooth medium size, mid-season to late, fine for preserves or for table use. Price: Pkt. 5c; ½ oz. 15c; oz. 25c; ¼ lb. 80c, postpaid.

BREAK O'DAY

Disease Resistant

404 (70 days.) Extra early. Resistant to wilt. The fruit is globe shaped, smooth, large, flesh firm and of fine quality, a bright scarlet color. Price: Pkt. 5c; ½ oz. 15c; oz. 25c; ¼ lb. 80c, postpaid.

No. 419 (75 days.) **YELLOW PEAR**
No. 406 (90 days.) **RED PEAR**

Price: Pkt. 5c; ½ oz. 15c; oz. 25c; ¼ lb. 80c, postpaid.

TREE TOMATO—(Dwarf Champion) Tomatoes on Trees!

414 (83 days.) There's been a big fuss about this Tree Tomato. It grows vigorously and is stocky, making a small tree loaded with tomatoes. Medium to late, fruits pink, grow in clusters, rather flat, globe shaped, good bearer. Price: Pkt. 10c; ½ oz. 15c; 1 oz. 25c; ¼ lb. 80c, postpaid.

PRITCHARD

Resistant to Wilt and Disease

423 (112 days.) A new wilt-resistant variety. I tried it out both here in the trial grounds and in my garden in Missouri, and taking it all the way around, it is the finest main crop tomato I know of. The fruits are very solid and heavy, smooth globe-shaped, a rich deep scarlet color and mild flavor, and fine for tomato juice. It has distinct topping habit and can be planted closer together than most sorts. Price: Pkt. 5c; ½ oz. 18c; oz. 30c; ¼ lb. 80c, postpaid.

PONDEROSA

Largest of All Tomatoes

418 (86 days.) Here's one you can't beat. It is too tender and doesn't hold up well for market but for home use there's nothing like it. The fruit is large, sometimes inclined to roughness, but very tender and meaty. Slices beautifully with few seeds. Vigorous grower. Price: Pkt. 5c; ½ oz. 20c; oz. 35c; ¼ lb. \$1.00, postpaid.

WATERMELON HEADQUARTERS

I want every farm to have a big watermelon patch. Even the backyard gardener should raise a few hills of them. Nothing will make the boys happier than a good melon patch of their own. My melon seed

comes from fields grown especially for seed crops. Melons like warm loose soil. Give them plenty of room, at least 10 feet each way. Figure about 50 hills from an ounce of seed, or 3 pounds to the acre.

THE WILT RESISTANT KLECKLEY SWEET

706 KLECKLEY SWEET No. 6. (90 days.) Originated by the Iowa State College to take the place of Pride of Muscatine. It has all the good qualities of Kleckley, plus the resistance to wilt, and similar diseases. Doesn't grow bottle-necked, stands handling and shipping well. Flesh is bright red, tender and extremely sweet. **Price:** Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 70c, postpaid.

STANDARD KLECKLEY SWEET LONG MELON

704 (85 days.) Probably the best known melon in America. The measuring stick by which all other varieties are compared. Large, cylindrical in shape. Weighs around 35 lbs. Dark green, flesh bright red. Very tender and sweet. **Price:** Pkt. 5c; oz. 8c; ¼ lb. 20c; 1 lb. 55c, postpaid.

FIELD'S FOURTH OF JULY

Ripe by July 4th

708 (70 days.) 20,000 of my customers swear by this melon year after year. One of the earliest melons grown. Average weight 8 to 10 lbs. Color is a deep green, marked with lighter stripes. Rind is exceptionally thin (not over ¼ inch). Flesh is dark red, tender, fine grained, unusually sweet and rich. **Price:** Pkt. 10c; oz. 19c; ¼ lb. 50c; 1 lb. \$1.50, postpaid.

DIXIE QUEEN

A Good Shipper

722 (80 days.) A recent introduction. It is a great shipper, and a fine melon for the home garden. It produces an unbelievable number of melons. The flesh is crisp and tender and has the fewest seeds of most varieties. The rind is thin, but tough. The color is striped light and dark green. Deliciously flavored, rich color. **Price:** Pkt. 8c; oz. 15c; ¼ lb. 40c; 1 lb. \$1.00, postpaid.

WILT RESISTANT STONE MOUNTAIN

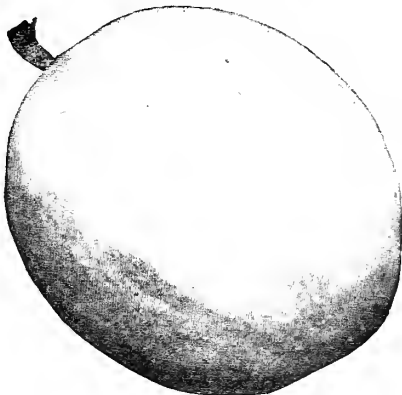

723 STONE MOUNTAIN No. 5. (85 days.) A new wilt resistant strain of the Georgia Stone Mountain. It has all the good qualities of the regular strain and in addition, will grow on wilt infested soil. **Price:** Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 75c, postpaid.

STONE MOUNTAIN—STANDARD LARGE ROUND

714 (85 days.) A great big melon, almost round. Weighs 50 lbs. in a good year. The rind is hard and tough, dark green, stands handling well. Very sweet in flavor, a bright sparkling color. **Price:** Pkt. 5c; oz. 8c; ¼ lb. 20c; 1 lb. 60c, postpaid.

GOLDEN QUEEN

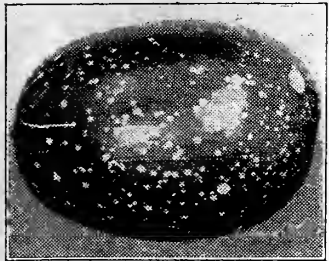

Yellow Outside—Red Inside

718 (85 days.) Yes Sir, it's a golden-yellow watermelon—that is the rind is a rich golden-orange yellow in color. The flesh of course is red just like the regular watermelon. Its flavor is unusually good, it eats most as well as Sugar Lump too. If you want something the other fellow doesn't have, get a packet of Golden Queen. The seed is limited, so order early. **Price:** Pkt. 15c; oz. 25c; ¼ lb. 75c, postpaid.

MOON AND STARS

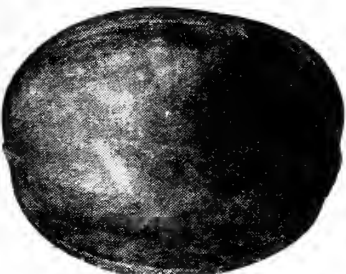

A Novelty Worth Planting

712 (85 days.) Quite a curiosity. Dark green, oblong variety with yellow spots an inch or more across which represent the moon, with many small yellow spots around it, representing the stars; hence the name. The quality is good and it's well worth planting. **Price:** Pkt. 10c; oz. 15c; ¼ lb. 35c; 1 lb. 90c, postpaid.

STATE FAIR MELON

The Melon I Win My Prizes With
SEED VERY SCARCE

701 (90 days.) This is the big Jumbo kind that you saw at my Jubilee. I used to take them around to the State Fairs and challenge anyone to raise bigger ones. They mature nicely here in this section. Melons often weigh 100 pounds or more. I have seed enough for only about ½ of the season. I ask that you please order early so you won't be disappointed. **Price:** Pkt. 10c; oz. 19c; ¼ lb. 50c; 1 lb. \$1.65, postpaid.

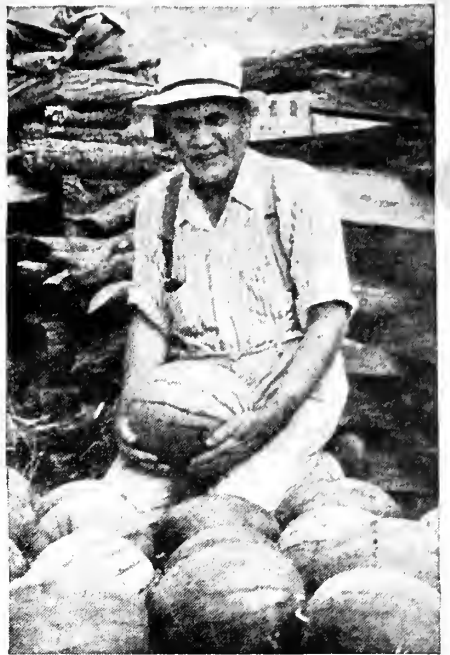

BLACK SEEDED KLONDIKE

Keeps Well

705 (90 days.) I recommend it highly. It carries the highest sugar content of any melon that I know of. Oblong, medium size, dark green rind, and small black seeds. The flesh is a beautiful sparkling, deep red, very crisp and tender, without a trace of strings. **Price:** Pkt. 5c; oz. 15c; ¼ lb. 35c; 1 lb. 60c, postpaid.

My Famous SUGAR LUMPS

Yes, the boss himself looking over a good bunch of my Sugar Lump Melons. Believe me—I'm pretty popular when they get ripe.

VERY EARLY

This new strain is the earliest I've found yet. Some are ripe by June 30. All varieties ripe by July 10.

"ICE BOX" SIZE

All of the varieties are individual size, about 8 or 9 inches through. Fit in an ice-box without cutting. No slice left over to get tough.

SWEET AS SUGAR

Sweetest ever. That's why Mrs. Field asked me to call them "Sugar Lumps."

AT LAST! GENUINE BABY GOLDEN

191 **BABY GOLDEN**. (85 days.) At last I have succeeded in getting some of the genuine Baby Golden popcorn. It took me years to get a stock of it worked up. It's been quite a job but I have the real thing now. Baby Golden has a squirrel tooth kernel, the ears aren't much bigger than my big finger and it's the "poppingest" popcorn I ever had. No hulls whatever, sweet and tender. Price: Pkt. 10c; 1/2 lb. 20c; 1 lb. 35c; 3 lbs. 90c, postpaid.

How to Grow Peanuts

Yes, you can grow peanuts in this climate just as well as not. They don't yield quite as heavy as they do in the south, but they do yield enough to give you plenty to feast on all winter.

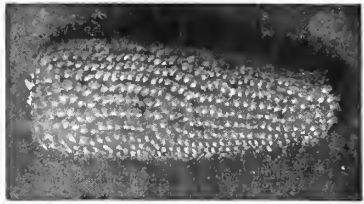

Plant just like beans, in soft loose soil, after it gets thoroughly warm in the spring. Thin to a foot apart in the row and keep well hoed.

JUMBO PEANUTS

218 Great big kind. Plant them the same time you plant beans. Not as early as the Early Northern but you are reasonably sure of a crop here in this section. Price: 1/4 lb. 10c; 1 lb. 30c; 3 lbs. 75c, postpaid.

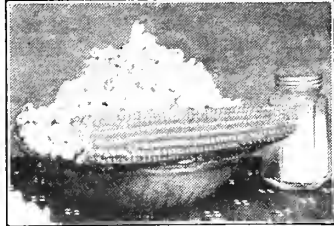

NEW HYBRID JAP HULLESS

193 (100 days) Absolutely the last word in popcorn. Originated by Minnesota Experiment Station and has a 16% greater yield with a popping volume more than 29% over the ordinary kinds of Jap Hulless. NEW! DOUBLE JOINTED PEANUTS

215 Most kinds of peanuts grow by twos—that is there are two of them in a nut-shell. Well, I have found something, a variety which grows down in Tennessee with three or four nuts in every shell. So we have called them Double Jointed. They are

prolific growers, do just fine, we had a lot of them here in the trial grounds this year and I wish everybody would plant them, especially the boys and girls. Price: 1/4 lb. 10c; 1 lb. 30c; 3 lbs. 75c, postpaid.

EARLY NORTHERN PEANUTS

219 The early peanut for the Midwest. Small, well filled pods with lots of them on the vine. Will ripen anywhere in the corn belt as they are early and like our soil. Price: 1/4 lb. 10c; 1 lb. 30c; 3 lbs. 75c, postpaid.

810 **WHITE GLOBE**. (75 days.) A large late variety which is good for table use or for stock feed. It produces a tremendous turnip. The roots grow 4 to 6 inches in diameter, entirely white. Price: Pkt. 5c; oz. 10c; 1/4 lb. 20c; 1 lb. 50c, postpaid.

806 **PURPLE TOP STRAP LEAF**. (45 days.) Very similar to the Purple Top White Globe except that it is flatter in shape. One of the finest garden sorts for either spring or fall planting. Price: Pkt. 5c; oz. 10c; 1/4 lb. 20c; 1 lb. 50c, postpaid.

This Year Plant the Best in Potatoes

Henry Field's State Certified (Blue Tagged) POTATOES

We went to the northern growers of certified seed and told them we wanted something better than ordinary seed potatoes. So they recommended and produced seed for us that not only is certified and tagged but most of it can be planted for foundation stock to raise seed. It's that good.

All seed potatoes ready for delivery about Feb. 15 to 20th, weather permitting. All put up in 100 lb. bags with certified tag on each bag, except Houmas which are packed 25 lbs. per bag, with certified tag.

HENRY FIELD'S FAMOUS "SPOTS"

Henry Field Herd Sows

Both are State Fair Prize Winners. I don't know where to go to find any better. That's the kind of breeding you get at Henry Field's and Henry still sells them at farmer prices. Henry Field "Spots" are money makers.

Henry Field's Famous Spots

Year in and year out, taking it "by and all" Good Hogs are money makers. I have proven it over and over again to myself and I know thousands upon thousands of you farmers have too. Like anything else, the best always pays the most. I am still sticking to my original idea of a farmer type hog and I breed them that way. I mean easy feeding, low, thick, wagon box type, the kind with heavy bones, with early maturing qualities. I know it's hard to find pigs like that everywhere but you'll find them in my herd.

Plenty on Hand

With our heated farrowing houses, we farrow sows the year around. That means we have plenty of breeding stock on hand at all times regardless of what your interests are. EVERY DEAL IS GUARANTEED TO PLEASE. I sell more hogs through the mail than I do over the fence so you needn't be afraid to send your order if you can't come here.

THE HOG FARM'S CORNER

FIELD'S NEW HEREFORD HOGS

Some of Our "Wagon Box" Hereford Gilts

The two on the right were first- and second-Prizewinners at the Nebraska State Fair. Look at those backs, shoulders, feet and heads. Did you ever see any better?

Field's New Hereford Hogs

Take a good look at the Hereford picture. Here is a new, all purpose breed, which has been stealing the shows at the state fairs in late years. Packers are glad to pay a premium for good Herefords any time because they kill out with the maximum of high priced cuts—loins, hams, and hams. They are always ready to go to market from 5 to 6 months weighing from 200 to 225 lbs., and that's the time to sell them if you want to make a real profit.

The Hereford hog is colored just like the Hereford cows—deep cherry red, white faces, white feet, white underline and switch. Not leggy or coarse. Herefords are quiet, very prolific, easy keepers, and make wonderful crosses with all standard breeds.

If you don't see what you want, listed, write me a letter and ask for it and I'll send you special prices.

We won a lot of prizes at the Iowa and Nebraska state fairs with our Hereford hogs this year. I don't have room to tell you about them here. Watch for the story in the spring Seed Sense.

The berries are large but have no hard cores or hollow spots. Deep dark red in color with no green tips and holds this beautiful color even when canned, and on top of all it's easy to grow. Grows anywhere, is free from disease, and bears and bears over a long season giving lots more fruit than you can use.

Introduced by Iowa State College. My choice of the new apples. Beautiful, big, bright, pure shiny red fruits, just load down the tree. Heaviest bearer of any apple I've ever seen. Sells better than any apple on the market. Has Jonathan blood but brighter red and heavier bearing. Bears farther north. An Iowa State College introduction made practically resistant to all disease.

A WARNING TO FRUIT GROWERS

Fruit trees by the thousands were killed by early freezes all over the middle west last winter. Less than 10% to 20% of some varieties remain alive. The demand for fruit trees to replace those killed is so great we suggest you reserve your stock **AT ONCE** so you won't have to wait a year.

IF YOUR ORCHARD WAS KILLED TOO, RESERVE STOCK AT ONCE While You Can Get It

HARDY CHERRIES

**Cherries Are Scarce This Year
Reserve Your Trees Early!**

The Heavy Bearing MONTMORENCY

The standard by which all cherries are judged. Big, rich-red, fruit, always loads down the trees. Juicy but firm for pies or preserves. Good to eat right off the tree, and if you have any left over they will always bring a premium on the market.

These are the hardy varieties for the Middle West. All big-rooted, heavy-bodied, well branched trees that will come into bearing early. 130 trees per acre. Set 18 ft. apart each way.

Hansen's Hardy Hybrid Plums

Bear Heavily and Come Into Bearing Early. Absolutely Hardy.

These are the famous hybrid plums of Prof. Hansen. He developed them for the severe Dakota weather, so they will stand any degree of coldness. Bear very heavily, branches often break with fruit. Come into bearing early—often 1st yr. after planting. The Fruit is delicious. Try them all if you can.

WANETA—Pictured Above

The most famous of all Hansen's Hardy Hybrid plums. Fruit big, bright red outside and crisp, juicy, sweet yellow inside. Heavy bearing, sure bearing and superhardy.

OPATA—Bears 1st Year

Bears often the year after planting. Reddish purple skin, yellow inside. Limbs are almost entirely hidden by clusters of fruit—so heavy you must watch you don't break the limbs. Grows on any soil. Ripens 10th of July.

SAPA—Beautiful Color When Canned

Fruit dark purple outside, wine-red inside. Rich flavored. Extra fine too for canning, sauce or jams, or for eating fresh from tree. Like Opata, bears early and heavy. Trees often produce blooms in the nursery row. Pit small and on account of rich wine red color, makes a beautiful sight when preserved, or for sauce. Plant Compass as a pollinizer. Bears right after Opata.

HANSKA—The Big Freestone

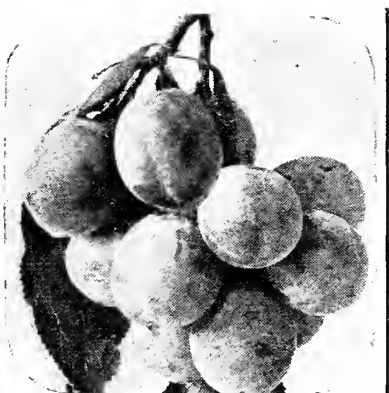

(Apricot Plum.) Big, reddish purple plum with sweet apricot perfumed yellow meat. Freestone. Bears right away after planting. Ripens in August.

UNDERWOOD The Giant Freestone

(American type.) My favorite at Centerville. Bears regular and fruit is immense. Ripens in July. Red freestone, good to look at and delicious to eat.

BLUE DAMSON. The old favorite blue plum excellent for preserves. A large freestone, and sure bearer.

GOLDEN EMBER The New Canning Plum Hangs on Tree Until Ripe

The new canning plum. Good sized and late—perfect for dessert or canning. Rich golden with glowing red bluish. Hangs on tree until fully ripened and then keeps 2 to 3 weeks. Ripens around September 1st. A hardy Minnesota production. Cost 49c ea. last year, now as low as 34c.

NOTICE: HENRY FIELD PREPAYS ALL SIZE FRUIT TREES, MOST NURSERIES DON'T!

HENRY'S HARDY HAWKEYE

The Hardest Peach I Know

Absolutely the hardest peach I've ever seen. Has extra sweet flavor, ripens in August. Fruit yellow with red blush. Medium size, and trees always loaded down.
This tree is the result of twenty-five years' selection and propagation. Bore a big crop in '27 after the coldest winter in twenty years. My own introduction and sold only by Henry Field.

THE FAMOUS POLLY PEACH

The Peach That's Sure-to-Bear

Super hardy, sure-to-bear variety. Big freestone—white overlaid with rich red blush. Keen flavor and juicy. Introduced by Iowa State College. Produced a big crop of peaches every year. Fine for canning as it is very firm. Next to Hawkeye, I believe this is the hardest, surest to bear. Stood 20 degrees below zero and bore a big crop. Now same price as other varieties. Ripens August 15th.

HARDY PEACHES

ABOUT PEACH TREES

I've watched peach trees and crops a good many years. Some varieties are pretty sure bearers and some aren't worth a rap. You can be sure I'm not offering you shy poor bearers. Listed on this page are the varieties I plant and believe in.
Plant 15 feet apart, or 190 trees to the acre. Plant peaches as fillers in your apple orchard.
All my trees are big, soon-to-bear, heavy rooted and I've priced them right. Dates given after varieties approximate ripening date. This may vary according to weather conditions.

Frost-Proof Semi-Cling

The earliest peach to ripen and really popular because it is the first fruit. Fruit medium size and a beauty with crimson colorings. Often called "Frost Proof" because it blooms late enough to miss the frost.

Plant 10 ft. apart each way. Big 1 1/2 to 2 ft. trees. 25 for 98c, postpaid. 2 to 3 ft. size. 25 for \$1.49; 100 for \$5.19, postpaid.

The Marvelous New One-Tree Orchards Bear up to 5 Different Fruits on One Tree!

HENRY FIELD BRINGS YOU 5 TO CHOOSE FROM

They said it just "couldn't be done" but here you are. Now every one, even with a tiny yard, can grow their own fruit. Science has made it possible now to grow several varieties of fine fruit on ONE

tree. **THINK OF IT!** Bear a full crop of fruit, each limb bearing a different KIND OF FRUIT! One of the most interesting novelties I've ever offered in over 50 years in the nursery business. Bear very young as their roots are all large. Very scarce, order now.

The "fool proof" red rose. Noted for hardiness, and free blooming qualities. Flowers large red full double. Will grow and produce hundreds of blooms in poor soil, with little care. Never seems to rest, but blooms constantly from spring to frost. Radiance roses bloom best of all varieties the first year they're planted, so if you want plenty of bouquets this year plant Radiance.

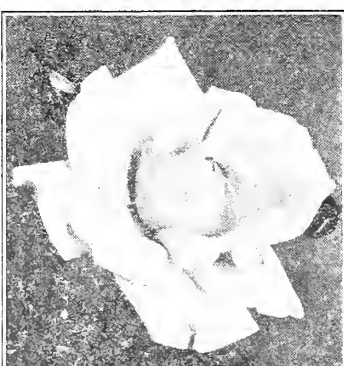

PINK RADIANCE

The Drought Resistant Pink

Best to bloom, best to resist heat, drought and disease of all the pink roses. Flowers big, full, brilliant rose-pink. Loaded down with blooms all summer long.

SOUVENIR DE CLAUDIUS PERNET

HOW TO PLANT SHRUBS

No need to say much. Every nursery order I send out has complete instructions easy to follow. Mostly, 16 w. growers are set 2 ft. apart, medium growers 3 ft. apart, and tall growers 4 ft. apart. Set out 18 inches from foundation.

Spread roots out well, tamp earth back solidly, and prune as indicated to make bushy growth.

Why Field's Shrubs Are Better

Got tired of telling you shrubs are 12" to 18" high or 18" to 24". You don't care about that. Good roots and branches are what you care about. You don't care a rap for a big, spindly shrub with poor roots. So here's how I grade plants. **SELECT PLANTS.** Big, healthy roots with lots of branches like I've always furnished. **EXTRA SELECT.** Clean of the crop with extra big roots from good growing condition and lots of branches. **THIRD GRADE.** Thrown away. Not fit to mail. (DON'T BUY this grade somewhere else. Not fit.)

All Shrubs Inspected

All my shrubs are carefully inspected, once when dug and again before they are shipped on your order. Absolute quality is insured. All bad shrubs are destroyed. All are carefully wrapped and packed in special moss to arrive in the best possible condition.

All My Shrubs Are Hardy

These are the world's finest, hardy shrubs. All are selected because they give color and beauty with the least effort in any kind of condition. Easy to grow. No special care needed.

DRESS UP YOUR HOME WITH HARDY VINES

Our vines are all extra heavy, well rooted, ready to give quick results. With just a small investment in vines, you can add hundreds of dollars in beauty and value to your home. Vines do many jobs. Grow them for shade—for beauty—for holding soil and to hide unsightly views.

HOW TO PLANT

To plant for a trellis or fence planting, set about 7 feet apart, and when planting around the foundation, set them out from the foundation about 18 inches. Spread the roots out well when planting and firm the soil down around the plants and soak thoroughly if possible. That's all there is to planting vines and the first thing you know you will have a beautiful sight.

A Bronze Mum with a Pink Center

This new mum is a color achievement. To the mum family now has been added a mum that comes out brown with a PINK center. Think of it. Extra large flowers, too. The pink becomes more pronounced as flowers open. Stems are long, flowers are large, and it is one of the finest of all the mums for cutting. Blooms as early as Pink Cushion and the plant is a mass of blossom. If you want to have Chrysanthemums for two or three months for cut flowers, be sure to plant this new mum ACHIEVEMENT. 29c each; 3 for 69c, postpaid.

JUDGE LEON SMITH

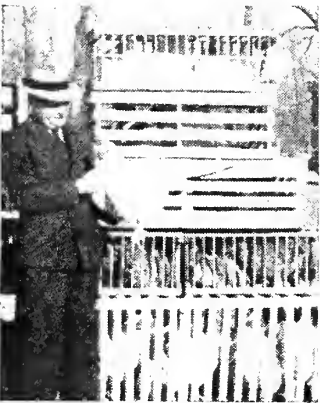

(Official A.P.A. Judge)

CHARGE OF ALL FIELD'S FLOCKS

In an effort to offer Henry Field chick customers the best possible chick breeding, we have obtained the services of Judge Leon Smith—official judge of the American Poultry Association.

He will devote his time EXCLUSIVELY TO FIELD FLOCKS—super-vising the culling, grading and blood-testing—to make sure Field's chicks remain the highest quality possible.

Very few men are able to pass the rigid examinations to become an A.P.A. Judge, but once they have passed it, they are considered the highest poultry authorities in the country. Beside the fine work Judge Smith is doing with our flocks and trap nest farm, he has been in constant demand for judging poultry at fairs and shows throughout this part of the country.

More Profits with FIELD'S LARGE TYPE LEGHORNS

Everywhere you go you see Field's Leghorns out-producing common strains. The reason is simple enough. Field's MASTER LEGHORNS have been bred right. The heavy up to 300 egg blood they carry makes them the heaviest producers of large eggs. Their parent stock has been rigidly culled and improved for years for size and type making them the large type (not beefy), vigorous producers. Being rustlers, they don't require the feed of most breeds and make more profitable birds.

LEGHORN COCKERELS MAKE PROFITABLE BROILERS

Field's Master Large-Type Leghorn Cockerels are at the top for highly profitable early-to-market broilers. They mature rapidly—in 8 to 10 weeks. This year, make big money on your chicks with Field's high-producing, large-type Leghorns as thousands are doing.

Field's Chicks "Stole the Show" at the Fairs

The ribbons above are a few of the many that went to our chicks this summer at the fairs. Out of 21 entries at the Nebraska State Fair, we came back with 22 ribbons and three champion birds of the show—best display in the American class.

At the Missouri State Fair we won the Champion display of the American class and 21 other ribbons, not shown here. This prize winning poultry is the kind of blue-blood ancestry that goes into every Henry Field chick. These ribbons mean that your chicks come from the best prize-winning stock and mean money to you, when you buy Field's chicks.

At the Kansas City American Royal National Poultry Show we made breeders all over the country sit up by taking 25 ribbons out of 35 entries besides winning the best display in the American class.

FIELD'S FAMOUS CHICK GUARANTEE

I GUARANTEE our prices to be as low, or lower, than any in America for the quality offered. We guarantee all chicks to be exactly as represented and to reach you 100% alive and in good condition. If any chicks are dead, or in bad condition, simply have your delivery agent sign statement and mail us within 24 hours and they will be replaced free.

I GUARANTEE to replace any chicks that die within the first two weeks, once, at one-half purchase price. Claim must be mailed within 15 days after chicks are received, and form will be sent you to fill out.

PULLET GUARANTEE—I guarantee 95% true to sex ordered on pullet chicks. If they run more than 5% males we will refund the difference in price between price of male and pullets on all over this 5%. This applies on both hybrids and purebreds. Form will be sent you to fill out.

COCKEREL GUARANTEE—I guarantee 95% true to sex on cockerel orders from our Best and Better Than The Best Grade, the same as on pullets. We reserve the right to substitute on our Good and Better Grade cockerels when necessary, using unsexed or partly unsexed chicks of the same variety and quality.

No red tape of any kind with these guarantees and any form sent for you to fill out, in case of chicks that die first two weeks and on pullet or cockerel chicks, is simply a form that enables us to give your claim prompt attention.

MAKE MORE PROFITS This Year with FIELD'S HYBRID CHICKS

ALL HYBRIDS ARE PROFITABLE

Just like hybrid corn and hybrid hogs are more profitable than purebreds—so hybrid chicks are more profitable than purebreds. Nowadays, everyone is turning to hybrid chicks to make more money than they ever have before from chicks.

HYBRIDS GROW FASTER

Hybrids—both pullets and males grow much more rapidly than pure breeds and get on the market sooner.

PULLETS LAY SOONER

Because they grow so rapidly, pullets start laying much earlier than pure breeds and lay larger eggs to start.

HYBRIDS ARE HEALTHIER

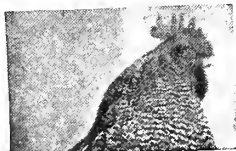

Hybrid chicks are resistant to disease and resist the colds and disease that sets purebreds back so much.

PULLETS LAY MORE AND LARGER EGGS

Hybrid pullets produce much more than purebred hens and the size of the egg is much larger.

COCKERELS GET ON MARKET SOONER

Hybrid cockerels grow faster, are more vigorous and get on the market earlier—getting the top prices.

Red Rock Hybrid
The Yellow-Skin Market Cross

This is one of the oldest and is one of the most popular dual purpose Hybrids. They are faster maturing and I recommend this cross above all others for heavy market purposes. Both the Barred Rocks and the Rhode Island Reds used in this cross have the fine yellow skin which is ideal for market purposes.

Leg Rock Hybrid
The Hybrid Egg Cross

By mating some of my outstanding White Leghorn males with some of my fine White Rock females I am producing the Leg Rock Hybrids. Combining all the good points of these two great breeds gives you a bird that has all the size of the White Rocks and the egg laying ability of the White Leghorns. They are faster maturing and when mature the hens resemble the White Leghorns and the males the White Rocks. Easy to raise for they are more rugged and disease resisting than some other breeds.

Leghorn Minorca Cross
Sometimes Called Legorca

The Leghorn Minorca cross is the most popular for people wanting an abundance of large white eggs. This cross gives you a white chicken larger than the White Leghorns, with plenty of health, and vigor to mature faster and to get into production quicker. The laying flock can be kept on less feed than some other varieties, and your laying flock mortality will be much less in most cases.

Hamp Rock Hybrid
Ideal for Meat Purposes

New Hampshires crossed with the Plymouth Rocks makes an outstanding Hybrid. By combining the old with the new I can produce a Hybrid that has all the good qualities of this fine old breed plus the fine qualities of the New Hampshires. They are faster maturing, faster feathering, weigh heavier, live better, and lay more eggs than most any of the heavy breed crosses. You will find they have a beautiful light barred plumage, and resemble the Barred Plymouth a great deal.

BEST BROILER HYBRID—CORNISH LEGHORN CROSS

My Cornish Leghorn Cross is just what you want to produce a two pound broiler in from 8 to 10 weeks. Both males and females have white plumage and are very easy to dress. They have excellent

breast development at two pounds and the breast meat is very white and thick and of excellent quality. The pullets make very good layers and will lay very early.

FIELD'S CHICKS IN MINNESOTA

Most of you know I ship my chicks all over the country—wherever people want the best producers but still don't want to pay 10 prices for them.

Here's the flock of Hanse B. Nielsen of Ruthton, Minn., who writes, "I always have splendid luck with chicks from Henry Field."

WHAT OTHER FIELD CHICK BUYERS SAY MY CHICKS PLEASED IN MISSOURI

"On March 29 I received my first Buff Orpington chicks from you. Had extra good luck for early chicks—raised 98 from the 100—have 23 hens and 10 roosters for my whole flock. Sold 2 roosters recently that weighed 19 pounds. When my pullets were 6½ mo. old I got first eggs. My hens are beautiful. I'm a booster for Henry Field chicks."—Mrs. Corrine F. Coats, Hallsville, Mo.

PART OF HENRY FIELD'S BIG SHENANDOAH TRAPNEST FARM

WHERE FIELD'S PRIZE-WINNING CHICKS ARE MADE

This gives you a birds' eye view of a few of the mammoth buildings on Field's big trap nest farm. Here is where the records of thousands of wing bonded, pedigreed pullets are carefully checked, and the cockerels hatched from the best eggs are used to head our flocks. This way high up to 300 egg blood from known pedigreed blood is bred directly into Field's chicks—meaning more money for you.

FIELDS UP TO 300 EGG BLOOD MEANS MORE PROFITS FOR YOU!

FIELD'S UP TO 300 EGG BLOOD MEANS MORE PROFIT FOR YOU

A 200-egg hen makes 6 times the profit of an average hen. That's why Henry Field chicks with 200- to 300-egg blood bred into them through generations are bound to be better money makers and larger egg producers. IT COSTS AS MUCH TO RAISE A SCRUB CHICK AS A GOOD PRODUCER. Buy the best and save money.

Hen who laid these cost 8c as a chick. Hen who laid these cost 7c as a chick.

WHICH HEN IS MOST PROFITABLE?

Better Breeding—Careful Culling and Blood Testing Make Field Chicks More Profitable!

The superiority of Henry Field Chicks doesn't just happen. It comes from careful, planned, expensive breeding. All my flocks are regularly inspected by my own inspectors under the direction of Judge Leon Smith. ALL BIRDS are carefully CULLED, WORMED, and BLOOD TESTED and no bird that fails to measure up to our highest standard is left in the flock. This careful breeding means HEALTHIER, MORE VIGOROUS, MORE PROFITABLE CHICKS FOR YOU.

TREMENDOUS VOLUME PERMITS PRICE CUT

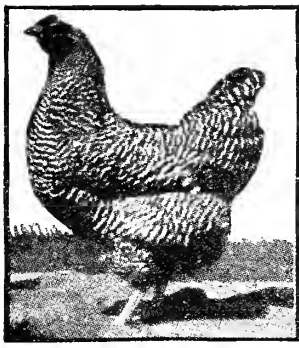

Each year thousands of people over the United States hear of the wonderful success my chicks have given others and send from all states to me to get Genuine Henry Field Chicks. This makes a tremendous volume—a volume so large I can Hatch Chicks for Less. This saving in hatching costs, I cut from my prices making them from \$1 to \$4 per 100 Lower—Quality for Quality—than many other chicks you can buy. It's your chance to save and get Better Chicks.

Plymouth Rocks—The Dual-Purpose Breeds

WHITE PLYMOUTH ROCKS

Henry Field's giant type White Plymouth Rocks have a beautiful snow white plumage, and will dress out at almost any age a rich yellow color free from pin feathers. They are one of the most popular dual purpose breeds due to their meat qualities and their ability to lay a large number of eggs. We have increased their production ability by careful culling, and mating with pedigreed males.

BARRED PLYMOUTH ROCKS

Henry Field's Barred Plymouth Rocks have proven their money making ability on many farms. They are large in size, very fast maturing, rapid feathering and are excellent layers of large, brown eggs. Many of the breeding males are from hens with proven ability to lay up to as high as 300 eggs per hen in one year. They make fine broilers or roasters and are the ideal dual purpose bird for any farm.

SINGLE COMB RHODE ISLAND REDS

Vigorous Egg Producers

Henry Field's deep dark red Rhode Island Reds are favorites on many farms. They are very strong and rugged, beautiful color and are next to Leghorns in egg production. By careful mating and culling I have developed my Reds so they are fast maturing, and quick feathering and will be ready for the early markets. Many males used in my Rhode Island Red flocks are from up to 300 egg blood.

FIELD'S NEW HAMPSHIRE

"Leghorn of Heavy Breeds"

Henry Field's New Hampshire can almost be called the Leghorn of the heavy breeds for they are very heavy egg producers, and combined with their heavy weight they are very hard to beat. They are noted for their fast growth and even feathering. They have the vigor and hardiness of the White Leghorns, and in some places they have replaced the Leghorns.

WHITE WYANDOTTES

Early to Market

Henry Field's deep breasted White Wyandottes are the first to go to market. They will reach from two to three pounds sooner than almost any other variety. They are very good rustlers, and many of my farm friends say they will almost make their own living by finding the waste feed around the farm. Wyandottes are big husky birds and have proven their egg laying ability on many farms.

FIELD'S WHITE MINORCAS Largest White Egg

The Henry Field's White Minorca is an egg production breed of chicken, larger than the White Leghorn and producing the largest pure-white egg of any variety. The Field White Minorca comes from blood which has held champion egg-laying records year after year. In official opinion, they were proven TO LAY MORE. There's always a ready market for Minorca hatching eggs, because the popularity of the breed makes the eggs scarce and high in price. For MORE PROFITS, I recommend you buy either the Best Egg or Special Laying grade. Also can supply Black Minorcas. See price list.

Henry Field's WHITE GIANTS

White Giants deserve the name because they are extra-large and grow very rapidly.

The Henry Field White Giant makes an excellent cockerel for caponizing, often weighing twelve pounds and more. Good capons bring top prices, that are much above regular market figures.

The pullets are good layers and their extra-size makes them desirable in every way.

GIANT BUFF ORPINGTONS Good Winter Layers

Henry Field's Golden Buff Orpingtons, due to their massive bodies and heavy plumage are ideal winter layers, laying lots of winter eggs when the market is usually highest. As they are one of the heaviest breeds of chickens, the males make very good capons, and have been known to weigh up to 14 lbs. If you are interested in winter eggs, be sure to order some of my Golden Buff Orpingtons.

GUARANTEE

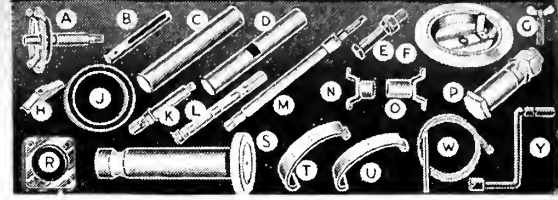

Each part listed is absolutely guaranteed to be brand new and have no defect in workmanship or material. It's got to please you in every way when you get it or may be returned upon receipt and full replacement or refund made. I'm going to please you 100% and save you real money.

A New Henry Field Service to Save You Money

Seeing tractor parts in my catalog may surprise you. But I've got a good reason. I found parts were being sold for 2 and 3 times what they could be sold for and I got so excited I fixed it up with one of the largest tractor parts companies in the country to supply me at prices 1/2 to 1/3 what you usually pay for the same part. I'm not a tractor man myself. I'm a salesman, but I've fixed it up with this company to have experts ship these orders for me, promptly, and to give you a deal you'll have to go a long way to tie. Look at these prices! See if I'm not right.

Folks—Just Look at Henry Field's Low Prices!

BOOK YOUR SEED NOW BEFORE THE RISE!

These seed prices can't last. You can see that just by looking at them. Whoever saw Red Clover selling for as low as \$6.50 per bu.? Not for over 8 years anyway. It's going to be the early buyer who gets the best deal. The ones who put off buying are going to pay the higher price which is sure to come as soon as a little trading starts at these low prices.

You're going to buy seed anyway. Why not buy it NOW before the rise and put the difference in your pocket and buy yourself a present sometime?

YOU ALWAYS SAVE BUYING DIRECT FROM HENRY FIELD

You never saw Henry Field when his field seed prices weren't a bargain. And you never saw him short change anybody in quality of seed. The reason is buying direct from him, you cut out a \$1 or \$2 or \$3 or more dealer commission and you get that saving for yourself.

Besides that, by buying in such tremendous quantities, I am always able to buy better seed, and buy it at a better price than a small dealer who may sell you only 1/100th as much. And that isn't even mentioning the many thousands of dollars worth of equipment we have to clean this seed up fine as the best anywhere, which most small seedsmen can't do. So always remember—you always save buying direct from Henry Field.

ONLY CHOICEST CAREFULLY TESTED SEED IS SOLD BY FIELD

I challenge anyone to show me better seed, quality for quality, than the beautiful seeds I'm sending out. Fact of the matter is, with the many new modern cleaning machines we have, it's cheaper for us to get all the weed seed out than it used to be to half-clean a lot of seed.

Every lot is carefully tested by Ames trained seed analysts, cleaned to remove any weeds or mixtures and labelled carefully for your protection. Buy seed where you get seed like this—seed that you can trust.

SOLD ON APPROVAL

My seed will please you 100%. You have the right to inspect it or test it in any way you see fit and if it doesn't please you in every way you can return it within 10 days and money returned. You are the judge. I please you or no deal.

FREE SAMPLES

I'm glad to send free samples of any of my field seeds to you at any time. Ask for special quotations, too, on large quantities.

BAGS FREE

All my prices include strong, clean cotton or burlap bags FREE. No extra charge. Remember this when comparing quotations.

PRICES SUBJECT TO CHANGE

Because of the low prices quoted for early orders, market changes probably will force rises when present lots are gone. For this reason, all prices have to be quoted subject to change without notice. Buy early at present low levels AND SAVE.

Just Think! WORLD'S FANCIEST RED CLOVER

ONLY \$8.50 Bu.
99.1% Pure

← Clean, Pure Red Clover Like This is Scarce.

Pure, Extra-Fancy Red Clover Absolutely Dodder Free 99.1% PURE

Beware of Weed Seed in LOCAL Trades Home Grown Red Clover of this quality is scarce. Most farmer lots this year are loaded with foxtail, pigeon grass, buckhorn, dodder and horse nettle that only highly specialized expensive machines like we have can triple re-clean to 99.1% pure. This lot has been triple re-cleaned. Absolutely the finest quality of Red Clover seed, way below price usually asked for this grade.

High Germinating This seed is well colored, plump, hardy, and high germinating, and is far cheaper on a live pure basis for you to seed than ordinary lots of red clover. Meets all AAA requirements.

Red Clover Mixture

50% Clover—50% Timothy Meets All AAA Requirements

\$5.25 Bu.

This Super rich mixture makes an ideal seeding. Half Red Clover, Alsike and Alfalfa. You ask how can Henry Field make such a price. It is only because we purchased a nice lot of this seed from the farmers in Minnesota early. Bought it worth the money and are passing it along to you on the same basis.

Makes Good Pasture Too

With the Timothy to provide the roughage it makes a pasture that is free from bloat also. Sow alone or with your regular oat seeding if you prefer. Just see that the seed is rolled in. Sow 10 to 12 lbs. per acre.

New Wilt Resistant Ladak Alfalfa

\$15.95 Bu. 99 1/4% PURE

The Wilt Resistant Alfalfa

This is the new alfalfa developed to resist wilt in those sections now having trouble. Highly approved by Ames College who put it at the head of the alfalfa list. Combines the hardy and heavy yielding branching root system with tall growth—the reason Ladak fields have been reporting extremely high alfalfa yields.

SEED SCARCE

This is new and seed much in demand. I have some of the finest, purest strain seed but it won't last long. Please order early.

SPECIAL LOT HARDY GRIMM ALFALFA

\$10.50 Bu.

ONLY FEW HUNDRED BUSHELS OF THIS BARGAIN!

We were only able to secure a few hundred bushels of this genuine Northern Grimm Alfalfa to offer at this price so that means order early. It will give you a hardy dependable seeding that will last for years.

HARDEST ALFALFA OF ALL

Grimm is the hardest alfalfa of all. Its long branching roots go deep, prevent winter-heaving and killing and is good for hard pan or clay subsoil territories. Somewhat leather and higher in feeding value than any other alfalfas.

A REAL BARGAIN—98 1/2% PURE

You won't be able to touch Grimm alfalfa at this price in a few weeks, so buy while we have it. This seed is 98 1/2% pure. High germination qualifies you for AAA payments (same as all the rest of Henry's alfalfas and clovers) and is a real value in every way.

BROME GRASS IS SCARCE BUY EARLY

No. 1 Northern Grown \$17.50 per 100

These Prices Can't Last Long

Brome Grass is a very short crop this year and the demand is extra heavy. We'll see big advances within 30 to 40 days—which means, buy your BROME early. THE MIRACULOUS DROUGHT RESISTING GRASS

HAVE 15 TO 20 TONS OF FODDER PER A. WITH GIANT ATLAS SORGO

The most sensational forage crop I've ever seen. Enormous producer. Outyields corn for fodder 3 to 1 and makes 15 to 20 tons fodder or silage per acre. Grows giant size—often 12 ft. tall.

Lives Anywhere
Atlas seems to love drought. Even if corn is severely dried up, Atlas stays green and makes a huge crop. Grasshoppers and chinch bugs don't like it. Atlas sown around cornfields help keep grasshoppers, chinch bugs, and hot winds away from the corn.

A Perfect Feed
Atlas is a perfect feed as it is a Sweet Sorghum cross, so cattle like it. They'll leave feed to get it. Very nutritious. 40 to 60 bu. grain per acre.

How to Sow
Sow 8 to 10 lbs. per acre with large corn plate running full speed. The more you sow the finer the stem. Don't get over 1" deep. Plant single rows same distance as corn. Harvest with corn binder.

Buy Only Certified or Affidavit Atlas
Much Atlas Sorghum sold is poor germinating and contains hybrids and low yielding mixtures. Don't take a chance on that seed.

I sell and want you to buy only STATE CERTIFIED AND SEALED ATLAS or AFFIDAVIT Atlas. It's high from our Registered Seed. It's high germinating, free of mixtures and to sow Atlas. No sense taking a chance with certified seed so cheap. See price right.

Affidavit Atlas
This is Atlas grown from our registered seed sown last spring. Clean, pure, high germinating.

Genuine-Sealed State-Certified Atlas
The finest, purest seed, absolutely free of mixtures and hybrids. High germination.

ARIZONA REGISTERED HEGARI BLUE TAGGED

Enormous Yields
Besides carrying more head of livestock per acre than any crop that I know of, Sudan yields 4 to 10 tons of hay per acre. High in feeding value. First hay crop in 60 days and the second crop about 6 weeks later—just before frost. Every farm needs a patch.

FIELD'S FAMOUS MULE-HYBRID WINS HIGHEST PERFORMANCE SCORE of ALL HYBRIDS in 11 DISTRICTS

MULE-HYBRID Makes 85 Bu. Per Acre in Nebraska Sandhills

Here's another sample of the kind of reports that come in from all over the country. After all, it's these reports that count for the farmer is the only one who can tell whether a hybrid is good or not.

This one is from D. E. Spencer of Keystone, Nebr., who wrote, "Here's a picture of a load of your No. 16 Mule-Hybrid which is making 75 to 85 bu. per acre. Beats anything in this part of the country. How's that for the sandhills?"

That's mighty good for the sandhills and it's just another case where the drought-resisting qualities of Mule-Hybrid saved a crop. Mule-Hybrid, yields more, Mule-Hybrid resists heat, disease, and insects better and Mule-Hybrid is sold DIRECT to save you \$1 to \$3 a bu.! Plant at least 1 or 2 bu. this year and see for yourself how it outperforms ordinary hybrids.

MULE-HYBRID Wins Over All in Official State Yield Contest—District 10

Below is the official state report of results of state hybrid corn trials in our district. As you will notice, Mule-Hybrid led the pack, with a performance score way above the nearest competitor. These were impartially judged by state men and this report appeared in bulletin form (No. P-2 New Series) and can be obtained by writing the Iowa State College at Ames, Iowa.

The New Way to Plant Corn!

NOW! "WEATHER-PROOFED" MULE-HYBRID CORN BLEND

- Throws Pollen Over Long Period
- Pollinates Silks Despite Hot, Dry Winds
- Insures Better Corn Crop

See if this doesn't sound like common sense to you! Everyone knows that if there is no pollen, there is no corn. Ordinarily growing corn sheds its pollen only during a period of 3 or 4 days. What happens if a hot wind happens to come along that particular time? There is no corn, or the yield is cut way down because it dries up the pollen and it can't fertilize the silks!

But the silks remain receptive to fertilization for 20 days. The ideal arrangement is to have pollen falling on them during most of this period. Then if a hot wind comes, for 4 or 5 days, it can't harm the corn yield. There will be more pollen coming.

New Blend Discovered!

We've done just that! By careful selection, and blending of selected hybrids we have a blend that will throw pollen over period of 20 to 25 days. If hot winds come, the corn will still throw pollen, enough to fertilize the silks and save the corn yield.

Actual Tests Prove It Works

The winner as the highest-yielding field of corn in United States last year was planted with a blend similar to this. It's the coming thing. We have tried and tested this blend on several farms under many conditions and in every case, the yield of this blend was greater than when one strain of hybrid was planted alone. It stands to reason it would be. Illinois state college tests show, even in normal years when all corn pollenizes easily, a scientific blend outyields one corn planted alone by 6 to 8 bu. per A. In a dry hot year, the difference would be twice this.

As usual, I'm ahead of the pack. You'll be hearing more about this from other companies when they learn about it from me. But DON'T JUST BUY ANYTHING THEY OFFER. It's taken me years to work out this blend. It must be done just right.

Have Two Blends

Weather-Proofed Blend A—For south half Iowa; Southeast Nebraska; Missouri and central Illinois.

Weather-Proofed Blend A1—For North half of Iowa, up to U.S. Hiway 18; northeast corner of Nebraska, southeast South Dakota, also south half of Kansas.

Weather-Proofed Blend A2—For northern counties in Iowa, southern Minnesota, eastern South Dakota, also southwest Kansas.

PRICE

ALL BLENDS

Edge Drop Grade **\$5.00** Bu.

Fancy Hill Drop Grade **\$3.50** Bu.

Actual Tests Show—My "Weather-Proofed" Blends Yield from 6 to 8 bu. per A. MORE than one hybrid planted alone. Pollenizes over 20 day period—thereby pollenizing despite hot days.

Field's MULE-HYBRID Score of Performance of 114.59 Highest in 11 Districts (OFFICIAL CONTEST)

By a safe margin, Henry Field's Mule-Hybrid corn, took first place in performance over all hybrids in district 10 of last year's Iowa State official corn yield contest. Field's Mule Hybrid had the highest rating—114.59—of all hybrids entered in 11 official districts.

This state yield contest was judged by disinterested state officials and its findings MEAN SOMETHING. Mule-Hybrid was graded on yield, stand, percent of moisture, lodging, ear height, dropped ears and damaged seed and despite competition of hybrids from everywhere CAME OUT FIRST.

The results of this test are available to anyone free if you write direct to Iowa State Agricultural Experiment Station, Ames, Iowa, and ask for 1939 Corn Yield Bulletin P2, New Series.

You don't have to pay \$7.50 for the best hybrid—BUY DIRECT FROM FIELD'S and SAVE \$3 per bu.

FARMERS' REPORTS ON MULE-HYBRID CORN MEAN SOMETHING!

Beats \$7.50 Hybrids

"Just a few lines to tell you how my Hybrid corn turned out this year. I had three other hybrids this year and paid \$7.50 bu. for them, but your MULE-HYBRID was by far the best corn I had. I planted 2 bu. of your corn in 1940. Next year I am planting TEN BUSHELS." Harry Dreyer, Storm Lake, Iowa.

75 Bu. Per Acre

"I have planted your 129R Hybrid for the last 2 years. Last year it made 75 bu. to the acre. This year it made 60 bu. I had some other hybrids, but your 129R made 12 bu. more than any of the rest." L. A. Betzer, Firth, Nebr.

"Book Me for 14 Bu."

"I haven't tried all the numbers of hybrid corns, but have tried 8 different varieties and some 25 different numbers of same and have SETTLED DOWN ON HENRY FIELD'S 129. Book me for 14 bu.—Will be up next week." Ed. M. Adkins, Burlington Jct., Mo.

Claims 110 Bu. Per Acre

"I never raised so much corn in my life before. I planted your No. 129 Mule-Hybrid and had 2 and 3 ears on every stalk. On 5 acres I picked 14 loads and think I had 40 bu. to the load. If you don't believe it come up and I'll show you the corn in the crib." Charley Abrahamson, Red Oak, Ia.

Will Plant Nothing But Mule-Hybrid

"I can't speak too highly of your 2 ear Mule-Hybrid. My 2 ear hybrid made 78 bu. to the Acre and my one ear Mule-Hybrid made 65. Both are everything you said. It stood right up and stood the drought and stayed green. I would never think of planting anything else now, but Mule-Hybrid." J. L. Simes, Olathe, Kans. Rt. 1.

SOME INTERESTING FACTS ABOUT FIELD'S FAMOUS MULE-HYBRID CORN!

Over 2,000 well-isolated acres are needed to produce Field's Mule-Hybrid corn.

All Mule-Hybrids, before they are approved for sale must pass vigorous tests for years to be sure they are:
 High, sure yielders
 Cold resistant
 Disease resistant
 Drought resistant
 Lodging resistant
 Uniform, easy pickers
 Non-suckering

Farmers in 15 states plant Mule-Hybrid every year.

Field's were the first to cut the unusually high prices most producers were asking for hybrid corn.

Field's dust every kernel of Mule-Hybrid with a special corn dust to hasten germination and help prevent damping off and insect damage by rodents.

Every lot of corn must test 94% or better or it is not sold. Test it yourself. You're the judge of whether it suits you or not.

Over 250 men were engaged in producing Field's Mule-Hybrid this year.

Henry Field has many new inbreds valued at \$100,000 to produce Mule-Hybrid.

Henry Field also sells State-Certified hybrids at prices way below what seedsmen who have no hybrids of their own ask for them.

Henry Field has a hybrid adapted to every kind of soil and climate condition. The fact his corn is grown in 15 states proves this. If you're not sure

which corn to plant, Henry Field will be glad to advise you free.

To prove freight on corn isn't expensive (as some agents will tell you), Henry Field will pay the freight for only 25¢ per bu. anywhere in Iowa, Mo., Kans., Ill., Minn. and Nebr. 50¢ per bu. anywhere else.

Buying DIRECT from Henry Field, you save for yourself the agent's commission which sometimes amounts from \$1 to \$3 per bu. for every bu. of corn they sell you. Think of it!

EDGE DROP GRADE IS COMMON FAVORITE

(Perfectly Uniform)

This is the grade everybody knows. Most farmers plant it as only a few realize the extra savings of planting Hill Drop and have switched to it.

All Perfectly Uniform

Every kernel is perfectly graded for thickness, length of kernel and width of kernel. Only uniform corn that will run smoothly through your planter with no trouble is sold.

Our grading equipment in our three hybrid corn plants is absolutely the most up-to-date there is assuring you of the best grading possible to obtain.

Edge Drop Supply Short

The supply of edge-drop this year was seriously cut down. If you put off ordering too long, we may not be able to furnish you with edge-drop in the number you want, so please order early.

HILL DROP GRADE YIELDS AS MUCH — Costs Less!

(Perfectly Uniform)

Most farmers plant flat kernel corn and don't know the advantages of hill drop corn. That's the only reason it's cheaper.

These small round kernels make the same or better corn than the flat kernels—the only difference being they weren't squeezed on the ear as much as the flat kernels. All are graded to be perfectly uniform in size and will plant as easily in your planter (with hill plates) as edge drop corn.

Hill Drop Stands Cold Better

Being small and round, they plant more acres per bushel. And, as they have more food in the kernel, they nourish the young corn plants better than small flat kernels, thereby giving you a stronger stand. It stands cold weather better, too.

Hill Plates Cost Only 60c Ea.

Plates to plant hill drop as uniformly as edge drop are readily available at any dealers. Cost about 60c ea. You save much more than that on only 1 bushel, and after that your saving is "velvet."

All Mule-Hybrid Treated to Prevent Disease
CORN DUST
Prevents disease and helps to increase your yield about 4%. Also protects your seed from squirrels, rodents, etc. 1 pound treats 5 to 8 bu. of seed. 1 lb. can \$1.00, postpaid.

STATE CERTIFIED, COMMON & U.S. HYBRIDS (IF YOU WANT THEM) **\$2.95** BU. & UP

AT PRICES WAY BELOW MOST SEEDSMEN'S

IOWA 931—The highest yielding, widely adapted state hybrid of 90-100 day maturity. Has a strong root system and stalk with ears about 3½ feet. Edge Drop, \$3.95; Hill Drop, \$2.95.

IOWA 939—The most widely adapted hybrid from Ohio to Nebraska and yields well on any soil especially light soil. Drought resistant. Ear about 3½ feet. About 110 days. Edge Drop, \$3.95; Hill Drop, \$2.95.

IOWA 942—The easiest hand picking corn in the world, similar to 939 but not as widely adapted and has a tendency to drop its ears. Ear height about 3½ feet. About 110 days. Edge Drop, \$3.95; Hill Drop, \$2.95.

IOWA 3088—A new Iowa hybrid to replace advantageously 942 and 939 in some areas. Has a large ear and is an excellent mechanical picker corn. Has medium rough ears about 3½ feet high. About 110 days. Edge Drop, \$4.95; Hill Drop, \$3.45.

IOWA 3110—Another new Iowa hybrid of later maturity to completely replace Iowa 13. Very highly recommended for both light and heavy soil in Southern and South Central Iowa. Has 1 and 2 large ears per stalk about 4 feet high. Drought resistant and a high yielder. About 120 days. Edge, \$4.95; Hill, \$3.45.

ILLINOIS 751—An early variety with about 100 days maturity. Reid type corn with ears about 3½ feet high. More highly recommended on average to rich soils. Edge, \$3.95; Hill, \$2.95.

ILLINOIS 360—A medium smooth variety of high yielding capacity on heavy soils. About 120 days maturity. 1 and 2 eared with ears about 4 feet high. Edge, \$3.95; Hill, \$2.95.

ILLINOIS 960—A two eared high yielding variety. Tops in many tests. Drought resistant and withstands heat. Widely adapted to different soil types in the later growing belt. Ear height about 4½-5 feet. Edge, \$3.95; Hill, \$2.95.

State Numbers Cheap—If You Want Them

Yes, we have State Certified hybrids, too. Some seed houses sell these exclusively as they have none of their own and state hybrids are available to everyone. We ask **LESS FOR THEM** as we feel Mule-Hybrid is far superior. It takes 5 years to get a breeding-improvement incorporated into a State Certified corn whereas with Mule-Hybrid we can add these improvements right away and we do. This puts Mule-Hybrid years ahead of State-Hybrids in these improvements.

However, some State numbers have made good showings and some farmers still plant them. We have about as complete a list as anyone and at prices **WAY BELOW WHAT IS USUALLY ASKED**.

ILLINOIS 200—A large eared variety of Reid type and high yielding ability. 130 days maturity. It is drought resistant and is recommended for average to richer type soils. Ear height 4½ feet. Edge, \$4.95; Hill, \$3.45.

ILLINOIS 201—Exceptionally high yielding Reid type corn with a wide adaptation in soil type. A single eared variety with ears about 4½ feet high. Both 200 and 201 are similar to U. S. 13. Edge, \$4.95; Hill, \$3.45.

ILLINOIS 212—Good for average to heavy soil in later maturity areas, single to 2 eared variety, with ear height about 4½ feet. Edge, \$4.95; Hill, \$3.45.

INDIANA 432—An early high yielding 2-eared variety highly recommended for North Central Iowa. Ear height 3 feet. Edge, \$3.95; Hill, \$2.95.

INDIANA 610—A medium maturity easy picking Krug type variety, single eared with ears about 3½ feet high. Edge, \$4.95; Hill, \$3.45.

NEBRASKA 463—Drought resistant, single eared, medium rough, with 110-115 days maturity. Ear height 3½ feet. Edge, \$4.95; Hill, \$3.45.

VANDY 15—A good yielder on more fertile soils, rather drought resistant, single large eared variety. Ear height 4 feet. Edge, \$3.95; Hill, \$2.95.

U. S. 63—A medium rough Reid type, high yielder on average to rich soils as far north as Des Moines, Iowa. Ear height 4 feet. Edge, \$3.95; Hill, \$2.95.

U. S. 35—An outstanding variety in the Southern half of Iowa and South Central Illinois. Reid type corn adapted to both lighter and heavier soils. Single eared, drought resistant with ears about 4 feet high. Edge, \$4.95; Hill, \$3.45.
